PROFESSIONAL SUMMARY

Technology leader and force multiplier with 15+ years spanning delivery, quality engineering, product operations, and organizational transformation across media, eCommerce, legal, and enterprise SaaS. Known for parachuting into complex, ambiguous environments and establishing clarity, velocity, and high-performing teams. Rapidly promoted within organizations — from individual contributor to director — by driving measurable outcomes, building accountability-first cultures, and partnering across Product, Engineering, Finance, and executive leadership. Certified Advanced Scrum Master and Product Owner with deep hands-on experience across the full SDLC: roadmap management, OKR frameworks, DORA metrics, AI-powered tooling, QA engineering, ERP integrations, and stakeholder delivery.

PROFESSIONAL EXPERIENCE

FOX Corporation December 2024 – Present

Senior Manager, Technology (Promoted from Contract Lead BA, December 2024 – November 2025)

- Directly manage a 21-person cross-functional team — 8 software engineers, 11 QA professionals, and 2 business analysts — across Salesforce, workforce management, ERP integration, and internal platform delivery workstreams.
- Lead $1M–$5M ERP integration (Workday/Infor) end-to-end, owning design, development, testing, and delivery of a scheduling platform for Sports and Entertainment freelancer operations.
- Built and launched FOX GPT — the organization's first AI-trained BA/QA assistant — automating user story and test case creation and reducing operational costs 15%.
- Designed and own DORA metrics framework tracking release frequency, lead time, change failure rate, and MTTR, establishing the team's first engineering performance scorecard.
- Lead incident retrospectives for production failures, driving root cause analysis, MTTR reduction, and systemic improvements in partnership with DevOps.
- Re-established Agile best practices across a 30-person organization, improving capacity planning, stakeholder alignment, and delivery predictability.

Latham & Watkins May 2024 – December 2024

Senior Manager, Technology

- Built quality engineering practice from the ground up for a 200+ application enterprise portfolio spanning .NET, C#, SQL, and Azure environments.
- Implemented enterprise-grade testing standards, tooling, and governance frameworks across Finance and Legal systems.
- Transformed manual testing team into agile automation engineers, improving release reliability across API, front-end, and data layers.
- Led prompt engineering for an AI legal tool, increasing user accuracy and measurable operational productivity across the legal technology team.

Skin Laundry August 2023 – December 2023

Director, Product Quality (Department Closure)

- Optimized Jira-based delivery workflows, boosting team productivity 25% across iOS and web application teams within four months.
- Accelerated clinic check-in performance 50% through product discovery and roadmap alignment, connecting customer insights to clear product direction.
- Established communication rhythms across product, development, and QA, proactively resolving delivery blockers.

Savage X Fenty June 2022 – July 2023

Director, QA & Platform Operations (Company-wide RIF)

- Architected full A/B testing strategy covering conversion optimization, data pipeline quality, feature flags, UAT, and performance testing — driving 30% increase in annual recurring revenue.
- Built integrated metrics platforms (TestRail/Tableau) establishing a single source of truth for delivery performance, reducing production incidents 25% and improving executive visibility.

- Directed test automation migrations, increasing execution speed and automation coverage 25% through team coaching and improved SDLC practices.
- Modernized QA tooling and cross-team workflows, improving staff retention 15% and reducing delivery strain.

Paramount / Pluto TV April 2021 – July 2022

Senior Manager, Quality Engineering

- Hired, led, and mentored a global team of 26 QA engineers across Europe and Latin America spanning Old CMS, New CMS, Content Feeds, and MAM teams — improving test coverage 15% and reducing time to market 10%.
- Reengineered release procedures, strengthening collaboration between DevOps, Product, and Engineering and improving on-time delivery.
- Led quarterly initiative planning and release approval across four Backend Content Systems teams, achieving 25% improvement in release reliability.

Conde Nast May 2017 – September 2018

Director, Product & Platform Integrity (Promoted from Senior QA Engineer — Brand Closure)

- Drove product vision for live media event platform supporting up to 10,000 attendees per event across the global brand portfolio.
- Owned product roadmap across QA, Engineering, and Product, reducing duplicate work 40% and improving delivery confidence.

EARLIER CAREER

Lead Product Owner / Scrum Master | FOX Corporation (Contract) (Prior engagement)

Owned product roadmaps and led QA, BA, and product ownership for Salesforce and .NET/SQL/JavaScript applications across FOX's Marketing and Entertainment divisions, driving roadmap decisions and delivery quality that led to FOX re-engaging and promoting to Senior Manager.

Senior QA Engineer | DMV.org (Company Closure)

Maintained and enhanced data-driven automation test suites (Java/Selenium/TestNG/AWS) across 6 owned-and-operated ad-tech websites driving $2.4M in revenue.

Senior Test Engineer | Real Capital Markets

Performed front-end, API, integration, database, regression, and UAT for Real Estate SaaS applications. Managed B2B technical support for enterprise clients, serving as technical bridge between customers and engineering.

Senior QA Engineer / Senior Technical Support Engineer | MadCap Software

Promoted twice: Technical Support Analyst to Senior Technical Support Engineer, then to Senior QA Engineer based on product fluency and quality instincts built from the customer up. Delivered enterprise-grade support for documentation tooling used by Fortune 500 clients.
